6 ANNUAL CONTRACTED QUANTITY

6.1 Annual Contracted Quantity

- 6.1.1 The quantity of the Contracted Grade of Coal agreed to be supplied at the Delivery Point by the Seller to the Purchaser and undertaken to be purchased by the Purchaser from the Seller at the Delivery Point per Year shall be as provided in ANNEXURE III (“Annual Contracted Quantity”).
- 6.1.2 For part of a Year, the Annual Contracted Quantity shall be pro-rated accordingly. The Annual Contracted Quantity shall be supplied as per the provisions of this Clause 6 and Clause 9.

6.2 **Annual Contracted Quantity post Grant of Mine Opening Permission by Coal Controllers’ Organization (CCO)**

- 6.2.1 In the event, mine opening permission for captive coal mine(s) allocated for Specified End Use Plant has been granted post execution of this Agreement, the Purchaser, shall within fifteen (15) days of the grant of mine opening permission by CCO, submit the CCO Certificate to the Seller. In case the Purchaser fails to submit the said CCO Certificate in accordance with this Clause 6.2.1, the Seller shall have the right to terminate this Agreement and invoke the Performance Security and additional performance security, if applicable.
- 6.2.2 Upon submission of the CCO Certificate, the Annual Contracted Quantity shall be adjusted on the basis of the Scheduled Production (on year-on-year basis) submitted by the Purchaser as part of the CCO Certificate. Such adjustment shall be carried out for the period post grant of mine opening permission by CCO and shall be on the basis of the annual coal requirement of the Specified End Use Plant(s) Blast furnace Units met through the Scheduled Production for each Year in accordance] with the following formula:

Annual Contracted Quantity for the year = Adjustment Factor * Coal Requirement of the Specified End Use Plant(s) Blast Furnace Units for the year in TPA

Adjustment Factor = Coal requirement of Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant met from a particular Lot in TPA divided by one point six (1.6) Million Tonnes

Coal Requirement for the year =

Normative Coal Requirement of the Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant as considered in the RFP in TPA + coal requirement of the Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant corresponding to the minimum of the Scheduled Production of coking coal as considered in the RFP in TPA – coking coal requirement of the Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant corresponding to the Scheduled Production of coking coal for the year in TPA.

Where a coal mine has been allocated for multiple plants, then the Coal Requirement of the Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant shall be calculated after proportionately factoring the Scheduled Production from the said mine.

- 6.2.3 In the event the Coal Requirement of the Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant for the Year, as computed above, is more than one point six (1.6) million tonnes, there shall be no

adjustment in the Allocated Quantity.

- 6.2.4 In the event the Coal requirement of the Specified End Use Plant(s) Blast Furnace Units of the Purchaser for usage in its Specified End Use Plant for the Year, as computed above, is less than or equal to zero, then Annual Contracted Quantity for that year shall be zero. In the event, the Coal Requirement as computed above, for each year during the Term of the Agreement is less than or equal to zero, then the Agreement shall be terminated.
- 6.2.5 In the event ACQ (Annual contracted Quantity) for any year pursuant to this clause is not an integer multiple of four thousand (4000), such ACQ for the year shall be decreased and rounded off downwards to the nearest integer multiple of four thousand (4000).

6.3 End-use of Coal

- 6.3.1 The total quantity of the Coal/Contracted Grade of Coal supplied pursuant to this Agreement shall be washed in the Washery and the End Products generated from such washing shall be utilized entirely within the Specified End Use Plant(s). The particulars of the Specified End Use Plant(s) are required to be declared by the Purchaser as detailed in ANNEXURE IV While beneficiation/ washing of raw coal lifted against the FSA, washed coking coal shall be generated to the tune of at least 20 (twenty) % of raw coal supplied by weight. Notwithstanding the above, the consumption of Coal Washery Rejects shall be in accordance with the Washery Rejects Policy or as per the extant policy guidelines issued by Ministry of Coal in this regard.
- 6.3.2 The Purchaser shall not sell, divert and/or transfer the Coal/ Contracted Grade of Coal for any purpose whatsoever and any such sale, diversion and/or transfer shall be treated as material breach of Agreement. In the event that the Purchaser engages in any such sale, diversion, transfer and/ or trade of Coal/Contracted Grade of Coal or the End Products generated from washing of the Coal supplied under this Agreement, the Seller shall, after giving the Purchaser a due opportunity of being heard on the matter, be entitled to terminate this Agreement without any liabilities or damages whatsoever payable to the Purchaser and forfeit the Performance Security and Additional Performance Security, if applicable.
- 6.3.3 It is expressly clarified that the Seller shall reserve the right to call for any document(s) from the Purchaser to verify the end-use of the Coal/ Contracted Grade of Coal and satisfy itself of the accuracy of the contents thereof. The Purchaser shall have the obligation to comply with the Seller's directions and shall extend full co-operation to the Seller in carrying out such verification. For the purpose of the aforesaid verification, the Seller may also rely on certification(s) from erstwhile sponsoring authorities viz. the District Industries Centre, Director of Industries or any other Department as may be nominated by relevant state governments for determining the existence and status of operation of the Specified End Use Plant.
- 6.3.4 Without prejudice to the above rights of the Seller, in case of specific complaints regarding non-utilization of Coal in accordance with this Agreement, such complaints may be referred to the relevant department(s) or agencies for suitable action.
- 6.3.5 The Purchaser shall submit an annual return including the details of the utilization of the coal to the Coal Controller Organisation. Coal Controller shall have the right to validate the same and seek additional information, which if required, the Seller shall submit within the stipulated timeframe.

6.4 Sources and Mode of Supply

- 6.4.1 The Seller shall endeavor to supply the Contracted Grade of Coal at the Delivery Point.
- 6.4.2 In case the Seller is not in a position to supply the Scheduled Quantity of the Contracted Grade of Coal at the Delivery Point on account of a Force Majeure Act or any other reason, the Seller shall have the option to supply the balance quantity of the Contracted Grade of Coal from the secondary source(s) indicated in 0 (“**Secondary Source(s)**”). Further, in case of supply of the Contracted Grade at the Secondary Source, the Purchaser shall accept the Contracted Grade of Coal directly from such Secondary Source(s). Additional costs incurred due to supply of the Contracted Grade of Coal at the Secondary Source(s) shall be borne by the Purchaser.
- 6.4.3 No flexibility shall be given to the Purchaser to take delivery of the Contracted Grade of Coal through any mode other than the mode specified in ANNEXURE III except where change of mode from Rail to Road is approved by the Seller as per ANNEXURE X

6.5 **Scheduled Quantity**

- 6.5.1 The Annual Contracted Quantity shall, unless otherwise agreed to in writing between the Parties, be delivered in equal monthly quantities during the Year which shall be calculated as Annual Contracted Quantity/12 (“**Scheduled Quantity**” or “**SQ**”); provided that during the first Year of the Term, the Scheduled Quantity shall be suitably pro-rated (i.e. the Scheduled Quantity to be delivered shall be computed suitably commencing from the Effective Date till 31st March of the next Year).
- 6.5.2 In case of supply by rail, the Parties agree that in case the Purchaser is unable to lift the Scheduled Quantity due to shortfall in the quantity necessary for formation of rake for transportation through rail mode, the balance Scheduled Quantity will be carried forward to the subsequent Month(s)/ Year(s). As and when such carried forward quantity is adequate to form a rake for transportation through rail mode, the same shall be supplied to the Purchaser. If at the end of the Term, any residual Scheduled Quantity remains (including any quantity which has been carried forward as aforesaid), the same shall be dealt with in the following manner:
 - (a) in case the residual Scheduled Quantity is two thousand (2000) TPA or more, the Purchaser will be supplied with the quantity equivalent to one (1) rake; and
 - (b) in case the residual Scheduled Quantity is less than two thousand (2000) TPA, such quantity will lapse.
- 6.5.3 Notwithstanding anything to the contrary contained herein, if for a Year, the Level of Lifting by the Purchaser falls below the thresholds specified in Clause 6.5.1 solely on account of the fact that the Purchaser has been unable to lift the Scheduled Quantity due to shortfall in the quantity necessary for formation of rake for transportation through rail mode, the Purchaser shall not be liable to pay any penalty for shortfall in the Level of Lifting caused due to the above-mentioned reason.
- 6.5.4 The total variation in the monthly Scheduled Quantity shall not, unless otherwise agreed to in writing by the Parties, exceed ten percent (10%) of the Scheduled Quantity.

6.6 **Penalty for short delivery/lifting**

- 6.6.1 Subject to the provisions of Clause 6.5.3, if for a Year, the Level of Delivery by the Seller or the Level of Lifting by the Purchaser falls below seventy five percent (75%) with respect to that Year, then the defaulting Party shall be liable to pay penalty to

the other Party for such shortfall in Level of Delivery or Level of Lifting, as the case may be (“**Failed Quantity**”) in terms of the following:

| Level of Delivery/ Level of Lifting in a Year | Percentage of Penalty for the Failed Quantity (at price payable under Clause 12 for Contracted Grade of Coal supplied) |
|--|---|
| Below 75% but up to 70% of ACQ | 0 -5 |
| Below 70% but up to 65% of ACQ | 5-10 |
| Below 65% but up to 60% of ACQ | 10-20 |
| Below 60% but up to 50% of ACQ | 20-40 |
| Below 50% | 40 |

The penalty shall be computed in the same manner as done slab-wise for computation of income-tax. However, unlike income tax, the percentage of penalty shall grow on a linear basis within each slab.

Illustration:

- (a) If the Level of Delivery/ Level of Lifting is below seventy five percent (75%) but up to seventy percent (70%) of the ACQ, the penalty would be one percent (1%) for each percentage shortfall in Level of Delivery/ Level of Lifting below seventy five percent (75%);
- (b) If the Level of Delivery/ Level of Lifting is below seventy percent (70%) but up to sixty five percent (65%) of the ACQ, the penalty would be five percent (5%) plus one percent (1%) for each percentage shortfall in Level of Delivery/ Level of Lifting below seventy percent (70%);
- (c) If the Level of Delivery/ Level of Lifting is below 65% (sixty five per cent.) but up to sixty percent (60%), the penalty would be ten percent (10%) plus two percent (2%) for each percentage shortfall in Level of Delivery/ Level of Lifting below sixty five percent (65%);
- (d) If the Level of Delivery/ Level of Lifting is below sixty percent (60%) but up to fifty percent (50%), the penalty would be twenty percent (20%) plus two percent (2%) for each percentage shortfall in Level of Delivery/ Level of Lifting below sixty percent (60%); and
- (e) If the Level of Delivery/Level of Lifting is below fifty percent (50%), the penalty would be forty percent (40%).

6.6.2 Penalty for the Failed Quantity shall be payable by the Defaulting Party to the other Party within a period of ninety (90) days from the date of receipt of a Claim in this regard from the Non-Defaulting Party. In the event of non-payment within the due date, the Defaulting Party shall be liable to pay interest as mentioned in Clause 14.2. In the event that the penalty along with interest payable thereon is not paid within a period of one hundred and eighty (180) days of receipt of the Claim as aforesaid, the Seller shall have the right to invoke the Performance Security and additional performance security, if applicable.

6.7 Level of Delivery and Level of Lifting

6.7.1 The “**Level of Delivery**” with respect to a Year shall be calculated in the form of percentage as per the following formula:

$$\text{Level of Delivery (LD)} = \frac{(\text{DQ} + \text{DDQ} + \text{FM} + \text{RF}) \times 100}{\text{ACQ}}$$

Where:

LD = Level of Delivery of the Contracted Grade of Coal by the Seller for the Year.

DQ = Delivered Quantity, namely, aggregate of actual quantities of the Contracted Grade of Coal delivered by the Seller for the Year.

DDQ = Deemed Delivered Quantity, reckoned in the manner stated in Clause 6.9.

FM = Proportionate quantity of the Contracted Grade of Coal which could not be delivered by the Seller for a Year due to occurrence of a Force Majeure Act affecting the Seller and / or the Purchaser, calculated as under:

$$\text{FM} = \frac{\text{ACQ} \times \text{Number of days lost under applicable Force Majeure Act}}{365}$$

Note: For the purpose of calculation of “*Number of days lost under applicable Force Majeure Act*”, the period affecting both the Parties shall be counted only once.

RF = Quantity of the Contracted Grade of Coal that could not be supplied by the Seller for the Year owing to the Railways not allotting wagons or not placing allotted wagons for loading within one hundred and eighty (180) days of allotment, in spite of specific valid indent/offer submitted by the Seller to the railways against valid program(s) submitted by the Purchaser for the purpose.

6.7.2 The “**Level of Lifting**” with respect to a Year shall be calculated in the form of percentage as per the following formula:

$$\text{Level of Lifting (LL)} = \frac{[(\text{ACQ} - \text{FM}) - \text{DDQ}] \times 100}{(\text{ACQ} - \text{FM})}$$

Where:

LL = Level of Lifting of the Contracted Grade of Coal by the Purchaser for the Year.

DDQ = Deemed Delivered Quantity, reckoned in the manner stated in Clause 6.9.

FM = Proportionate quantity of the Contracted Grade of Coal which could not be lifted by the Purchaser for a Year due to occurrence of a Force Majeure Act affecting the Seller and / or the Purchaser, calculated as under:

$$\text{FM} = \frac{\text{ACQ} \times \text{Number of days lost under applicable Force Majeure Act}}{365}$$

Note:

- For the purpose of calculation of “*Number of days lost under applicable Force Majeure Act*”, the period affecting both the Parties shall be counted only once.
- Non supply of rake by Railways within one hundred and eighty (180) days of allotment shall not be construed as failure on the part of the Purchaser.

6.8 For the purpose of computing DDQ and RF, the weight per rake will be that declared by the Seller for any rake-load. The weight so derived will be used for calculation of penalty from

either the Purchaser or the Seller.

6.9 Deemed Delivered Quantity

For the purpose of this Agreement, the aggregate of the following items provided under Clause 6.9.1 to Clause 6.9.2 shall constitute the “**Deemed Delivered Quantity**” with respect to a Year:

- (a) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to omission or failure on the part of the Purchaser to submit in advance the designated rail program(s) to the Seller as per agreed time-table with respect to the Scheduled Quantity in accordance with Clause 9.1. The quantity of the Contracted Grade of Coal not supplied by the Seller owing to cancellation, withdrawal or modification of the rail program(s) by the Purchaser after its submission whether before or after allotment of wagon(s) by railways.
- (b) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to the Seller exercising the right of suspension of supplies in terms of Clause 15.
- (c) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to the Purchaser failing or omitting to fulfill the requirements under Clause 13.
- (d) The quantity of the Contracted Grade of Coal offered by the Seller which is not accepted by the Purchaser.

6.9.2 For Supply of Coal by Road

- (a) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to omission or failure on the part of the Purchaser to book orders for the Scheduled Quantity in terms of Clause 9.2.
- (b) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to the Purchaser’s failure to place the requisite number / type of road transport at the Delivery Point for delivery of the Contracted Grade of Coal within the validity period of the sale order/delivery order.
- (c) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to the Seller exercising the right of suspension of supplies in terms of Clause 15.
- (d) The quantity of the Contracted Grade of Coal not supplied by the Seller owing to the Purchaser failing or omitting to fulfill the requirements under Clause 13.
- (e) The quantity of the Contracted Grade of Coal offered by the Seller which is not accepted by the Purchaser.

6.9.3 Deemed Delivered Quantity in terms of Clause 6.9.1 and Clause 6.9.2 shall be calculated on a cumulated Monthly basis for a Year.

- 8.1 If the Contracted Grade of Coal is delivered for dispatch by rail, each wagon shall be weighed at the weighbridge of the Seller, at the Delivery Point and the recorded weight shall be entered in the relevant dispatch document/railway receipt. Such recorded weight shall form the basis for raising bills by the Seller. The weighment shall be on wagon-to-wagon basis in the manner described hereinafter:
- 8.1.1 In case wagons are weighed on an electronic weighbridge, the weight recorded in the computerized print out shall be taken as the weight for the respective wagon. In the absence of a computerized print out facility, the weight as certified by the railways shall be reckoned as the weight and shall be binding on the Parties.
- 8.1.2 In the absence of electronic weighbridges, the weighment shall be done on the mechanical weighbridges at the Delivery Point.
- 8.1.3 In the cases not covered by Clause 8.1.1 or Clause 8.1.2 above, the weight recorded on the relevant dispatch document/ railway receipt as per existing practice of the railways shall be reckoned as the weight and shall be binding on the Parties. However, the wagons will be loaded up to the permissible capacity fixed by the railways for such wagons on the basis of volumetric measurement.
- 8.2 If the Contracted Grade of Coal is delivered for dispatch by road, the weight recorded at the weighbridge of the Seller at the concerned Delivery Point and as mentioned in the dispatch document shall be binding on the Parties.
- 8.3 The Purchaser shall be entitled to depute an authorized representative to witness the weighment / loading of the wagon(s) at the Delivery Point.
- 8.4 The weighbridges at the Delivery Point at Seller's end shall be calibrated and maintained as per Applicable Laws. The Seller shall regularly monitor the accuracy of the weighbridges. It is clarified, that the Seller shall have the sole discretion and right to replace, substitute or change the third party sampling agency chosen by it.

1.2.2 The third party agency chosen by the Seller shall conduct the third party sampling throughout the Term/Period as applicable; provided that the Purchaser may make a written request (on reasonable grounds) to the Seller to change the third party agency chosen by the Seller. In the event that the Seller does not accept the request of the Purchaser for change in the third party agency, the Purchaser shall have the option to:

1.2.3 Third party sampling shall be done at the Delivery Point and the costs in this regard shall be borne equally by the Purchaser and the Seller.

2. DETAILED MODALITIES FOR THIRD PARTY SAMPLING

Modalities for collection, handling, storage, preparation and analysis of coal samples and submission of the analysis results by the Third Party Agency shall be as under:

2.1 General

- (a) In order to commence third party sampling, a tripartite agreement will have to be signed amongst the Seller (First Party), the Purchaser (Second Party) and the Third Party Agency (Third Party). The format of the tripartite agreement shall be provided by the Seller. Detailed terms and conditions of the Third Party Agency engagement/work including Referee SOP/sharing of cost of sampling, etc. shall be in accordance with Tripartite Agreement.
- (b) Collection and preparation of samples may be witnessed only by the authorized representatives of the Seller and Purchaser. In case the authorized representative of either Party is not present or does not witness the sample collection and preparation activities, the said work shall be continued by the Third Party Agency irrespective of non-witnessing by either Party. Absence and/or failure to witness shall not be considered as a ground for disputing the result by either party. At any point, only one authorized representative each from the Seller’s side and Purchaser’s side shall be allowed to be present during the sample collection and preparation activities.
- (c) The Third Party Agency shall communicate the analysis results of the sample(s) to the Seller and the Purchaser as per the stipulated time period mentioned in the contract. The Seller/Purchaser may raise dispute if any, against the findings of the Third Party Agency within seven (7) days after the submission of the analysis results excluding the date of submission of the analysis results by the Third Party Agency.

2.2 Collection of Samples by the Third Party Agency

Samples of Coal shall be collected by the Third Party Agency from the Delivery Point as follows:

2.2.1 Collection of samples from loaded wagons (Rail and MGR)

- (a) Rake-wise, grade-wise and consumer-wise coal supplied from one Delivery Point shall be considered as one lot, in case of supplies by rail.
- (b) In case of Coal dispatches through MGR the sample collected from each rake (source wise, grade wise and Consumer wise) loaded from the respective Delivery Point during the day shall be pooled together to form a gross sample for the day.
- (c) Each Rake shall be divided into a no. of sub-lots in a manner that the quantity of Coal / number of wagons in such sub-lots is more or less equal. One sample shall be collected from each sub-lot. The number of sub-lots shall be determined as under:

| No. of wagons in one Lot | Number of sub-lots/samples |
|----------------------------|----------------------------|
| Up to 30 wagons | 4 |
| >30 wagons up to 50 wagons | 5 |
| >50 wagons and above | 6 |

- (d) Each sub-lot consists of one (1) wagon selected as per random table given in IS:436 (Part I/Section I) 1964 for collection of sample/ increments.

- (e) In each wagon selected for sampling, the sample shall be drawn from one spot in such a manner so that if in the first randomly selected wagon, the sample is collected at one end, in the next random wagon the sampling spot will be in the middle of the wagon and in the third random wagon, the sampling spot will be at the other end and this sampling procedure shall be repeated for all subsequent random wagons.
- (f) Before collecting the samples, the sampling spot will be leveled and at least 25 cm of Coal from the surface shall be removed / scrapped and the place will be leveled for an area of 50 cm by 50 cm.
- (g) About 50 kg of sample shall be collected from each selected wagon in the lot by drawing 10 increments of approx. 5 kg each with the help of shovel / scoop.
- (h) Any stone / shale of size more than that specified in Annexure III shall be remove/ discarded from the sample;
- (i) Samples thus collected from all the selected wagons in a lot shall be mixed together to form one gross sample per lot.
- (j) In case live overhead traction line exists in the siding, Third Party Agency shall ensure that the power supply in the overhead traction is essentially switched off before commencement of sample-collection process from loaded wagons.

2.2.2 Collection of Samples of Coal Dispatches by Road

- (a) Samples shall be collected source-wise and grade-wise on daily basis round the clock, depending upon the timing of loading at respective dispatch point(s) only from the trucks of the purchaser (s) who have opted for third party sampling ("**Purchasers Opting for Sampling**") in the manner specified below.
- (b) The first sample of Coal shall be collected from the first truck at the Delivery Point belonging to a Purchaser Opting for Sampling. Once a sample is collected from the first truck as stipulated above, samples of Coal shall be collected from every 8th (eighth) truck after the truck from which the first sample has been collected. In the event that such 8th (eighth) truck does not belong to a Purchaser Opting for Sampling, then the next truck belonging to a Purchaser Opting for Sampling shall be deemed as the 8th (eighth) truck and a sample shall be collected from such truck. The same process shall be repeated for every 8th truck thereafter.
- (c) The sampling spot at the top of the loaded truck, selected randomly will be leveled and at least 25 cm of Coal surface shall be removed/ scrapped from the top and the place will be leveled for an area of 50 cm by 50 cm for collection of sample.
- (d) About 30 kg of the sample shall be collected from each truck by drawing 6 increments of approx. 5 kg each with the help of shovel/ scoop.
- (e) All the samples collected from source wise, grade wise from every 8111 truck in accordance with paragraph 2.2.2(b) as above on daily basis shall be mixed together to fom1 a gross sample.

- (f) Any stone/shale of size more than that specified in Annexure III shall be removed / discarded from the sample.

2.2.3 Collection of Samples of coal from Conveyor Belt/ Ropeway / Pipelines:

- (a) Samples shall be taken lot-wise, grade-wise.
- (b) The quantity that passes over the conveyor (directly or through rope way/ pipe line) in a day (00 hrs to 24 hrs) constitutes one lot, which needs to be divided into a no. of sub-lots for the purpose of sampling. No. of sub-lots to be divided & quantity of gross sample to be collected from sub lots shall be as below:

| Wt. of the Lot (Tons) | No. of sub-lots/gross samples | Qty to be collected (Kg) |
|-----------------------|-------------------------------|--------------------------|
| Upto 500 | 2 | 100 |
| 501 to 1000 | 3 | 150 |
| 1001 to 2000 | 4 | 200 |
| 2001 to 3000 | 5 | 250 |
| Over 3000 | 6 | 300 |

For example:

- i) If the qty to be passed in a day over the conveyor is 600 tons (which is 1 Lot), then there will be 3 sub-lots and total sample quantity will be 150 kg
- ii) 1 gross sample shall be collected from 1 sub-lot, @ 50 kg per sub-lot. Thus, total 150 kg gross sample shall be collected from 3 sub-lots over the whole day, i.e. from 0 hrs to 24 hrs
- iii) If the conveyor is operated for 15 hours in a day, spacing the collection of 150 kg over 15 hours of conveyor operation, we need to collect 10 kg every 1 hour (qty & intervals can be mutually decided by seller & purchaser depending on the running time of the conveyor and the qty that passes in a day
- (c) The belt needs to be stopped at the scheduled time to facilitate collection of the samples manually.
- (d) While collecting the sample, the scoop should traverse the entire cross-section of the conveyor belt, drawing app 5kg per increment
- (e) Any stone / shale of size more than that indicated in Annexure III shall be removed / discarded from the sample.
- (f) There shall be one gross sample for the day mixing all the gross samples collected from all the sub lots during a day.

2.3 Preparation of laboratory samples

- 2.3.1 The gross sample collected at the loading end by the Third Party Agency shall be divided into two portions. One portion (one fourth of the gross sample) called Part - 1 shall be used for

analysis of Total Moisture and the other portion (three fourth of the gross sample) called Part - 2 for determination of ash, moisture and GCV on Equilibrated Basis.

- 2.3.2 The Part-2 Sample shall be reduced into laboratory sample. For the general procedure for reduction of gross sample and preparation of moisture sample and laboratory samples, IS : 436 (Part I/Set I)-1964 (latest version) shall be followed.
- 2.3.3 Final Laboratory samples shall be in the size of 12.5 mm for determination of Total Moisture and in the size of (-) 212 μ (micron) IS sieve for determination of ash, Equilibrated Moisture (at 40°C and 60% RH) and GCV. Due care shall be taken by the Third Party Agency to ensure that the final lab sample is essentially in(-) 212 μ (micron) size before the same is collected from the loading point(s) so that no further sieving or pulverizing is warranted at the laboratory before analysis.
- 2.3.4 The final pulverized sample shall be divided into four equal parts viz. Set - I, Set - II, Se – III and Set - IV of 500 gms each as detailed below:
- (a) Set - I shall be taken by the Third Party Agency to a NABL Accredited Laboratory for analysis of ash, moisture and GCV (on equilibrated conditions' basis at 40° and 60% RH) as per latest BIS Standards (IS: 1350 Part 1-1984, reaffirmed 2019) or (IS 1350 Part-2 :2022), as applicable;
 - (b) Set-II of the sample shall be handed over by the Third Party Agency to the Seller
 - (c) Set-III of the sample shall (i) in case of mode other than road, be handed over by the Third Party Agency to the Purchaser; and (ii) in case of road mode, be handed over in equal portions to all of the Purchasers Opting for Sampling on that particular day; and
 - (d) Set- IV of the sample called Referee Sample shall be sealed jointly by the Third Party Agency in the presence of the authorized representatives of each of the Parties (in case of mode other than road) or representatives of each of the Purchasers Opting for Sampling (in case of road mode), as the case may be, and shall be kept in custody of the TPA at the Delivery Point (loading point) under proper and good quality lock and key arrangement. The referee sample shall be retained in double sealed condition (duly signed by the Third Party Agency and the authorized representative of the Parties or the representatives of the Purchaser Opting for Sampling, as the case may be) for minimum 30 (thirty) days from the date of sample collection, beyond which it may be destroyed after necessary details are properly recorded by Third Party Agency. For the purpose of Referee Analysis, the referee sample(s) shall be packed and transported by the Third Party Agency in a tamper proof manner, to the satisfaction of Seller and Purchaser(s), to the referee lab from the loading points. The Seller and Purchaser (s) can exercise the liberty to accompany the Third Party Agency to the referee laboratory at their own expenses.
- 2.3.5 Samples shall be collected, packed and transported by the Third Party Agency to the sample preparation site(s) at the loading points in such a manner so as to make them tamper proof to the satisfaction of both the Seller and Purchaser (s) for which detailed procedure may be worked out at the Delivery Point (Loading Point) jointly by representatives of the Seller, Purchaser(s) and Third Party Agency.
- 2.3.6 In the event that a dispute is raised by the party(ies) within the time period stipulated at paragraph 2.1(c) above, the referee sample shall be analyzed by a government laboratory (other than the Laboratory at which the original sample has been analyzed by a Third Party Agency). The analysis and transportation cost of the referee sample shall be borne by the

challenging/disputing parties. The non-disputing party(ies) may witness transportation and analysis of referee sample to the above mentioned government laboratory of their own cost. The findings of such government laboratory, post analysis of the referee sample, shall be binding only on the challenging / disputing parties and the non-disputing parties shall be bound by the findings of the Third Party Agency.

- i. Sample will be collected and prepared by Seller's facilities.
- ii. The final laboratory sample will be divided into two parts. First part Set-I of sample will be analyzed by seller and second part Set-II will be kept for referee analysis.
- iii. Analysis of the sample will be done in Seller's laboratory.
- iv. Cost of sampling and analysis will be borne by the seller, so there will be no requirement of sharing of cost of sampling between seller and purchaser.

- v. Cost of referee sample analysis in a designated Government Laboratory including cost of transportation of sample will be borne by the disputing party.
- vi. Purchaser shall associate / witness in throughout the collection, preparation and analysis. However, absence and / or failure of Purchaser(s) to associate / witness shall not be considered as a ground for disputing the process / results.
